📁 CAREER OBJECTIVE

Passionate Software Engineer specializing in Web Development and AI-driven Solutions. Skilled in Laravel, PHP, React.js, and Python, with a strong focus on building scalable and user-centric applications that leverage modern AI technologies

📁 PROFESSIONAL EXPERIENCE

Sep 2024 – present
Dhaka, Bangladesh

AdPlay Technology LTD, Software Engineer

- Developed and maintained enterprise-grade Laravel applications integrating AI-powered tools, enhancing system efficiency.
- Designed scalable backend APIs and optimized system architecture for performance and reliability.

Apr 2024 – Jul 2024
Rajshahi, Bangladesh

SATT Academy IT, Software Developer

- Built and maintained dynamic web platforms using Laravel and MySQL.
- Collaborated in a team to design and deploy several educational web systems.

Aug 2023 – Mar 2024
Rajshahi, Bangladesh

BYETS, Web Development Trainer

- Conducted training on full-stack web development (PHP, Laravel, JavaScript).
- Mentored students on real-life projects and development best practices.

📁 PROJECTS

Quizmaster.club 🌐, (React.js, REST APIs, MySQL)

- Developed an interactive quiz platform at [quizmaster.club](#) 🌐 supporting live quiz sessions, leaderboards, winnerboard, and loyalty.
- Campaign image for campaign quiz
- Integrated third-party REST APIs for question bank management and real-time score updates.
- Designed responsive UI components and implemented client-side state management for seamless gameplay.

Gamestar.team , (React.js, REST APIs, MySQL)

- Built a fully responsive gaming platform at gamestar.team  with dynamic product browsing and real-time API integrations.
- Implemented secure user authentication, and an optimised checkout flow.
- Developed RESTful API consumption layer with caching and error-handling for a smooth UX.

Creative AI Platform , (Laravel, AI APIs (Text-to-Image), MySQL)

Integrated AI creativity tools within a Laravel app, enabling users to generate text or images via API.

- Implemented AI-driven text/image generation.
- Built admin panel for user & task management.
- Integrated secure authentication with Laravel Breeze/Jetstream.
- Microsoft Graph API for email verification
- 30+ creative generation.

AdPlay DSP Panel, (Laravel, Microsoft Graph API, Stored Procedures)

- Developed a real-time data synchronization dashboard using **Laravel** and **stored procedures** for efficient analytics.
- Integrated **Microsoft Graph API** to automate daily email reports with synced campaign data.
- Built dynamic campaign setup modules supporting multiple ad types and reporting filters.

Chargee.shop , (React.js, MySQL, REST APIs)

- Built a full game platform with product browsing, cart, and secure checkout flow.
- Implemented **email verification** and **OPT system login** for enhanced user security.
- Developed dynamic product search with page-wise filtering and sorting for better UX.
- Ensured optimized performance and responsive design across devices.

S&J BD LTD , (Laravel, MySQL) Garments Buying House/Agents dynamic website.

- Developed dynamic sections like product showcases, inquiry forms, and admin dashboards.
- Emphasized responsiveness and SEO-friendly architecture.

SKILLS

Languages: PHP (OOP), JavaScript, C, C++,
Python

Database: MySQL, MSSQL, MongoDB

Version Control: Git, GitHub, GitLab

Frameworks: Laravel, Livewire, React.js

Frontend: HTML, CSS, Bootstrap, jQuery,
AJAX, JSON

EDUCATION

B.Sc Engineering of Information and Communication Engineering(ICE),

Pabna University of Science and Technology, Pabna - 6600, Bangladesh

COMPETITIVE PROGRAMMING PROFILE

- National Collegiate Programming Contest
SUST techfest-2019
- Participated more than 70 online
programming contest
